Update – Phase I of Telescope Housing

Dana Fahnrapp discussed the slab for the telescope housing. The slab has already been approved, but we did things backwards. She would like the building to be 11 x 16 instead of 20 x 20. We needed to know the building size first. She has learned a lot about this type of building. She will come to this group next for the building to be included in the INSPIRE program. She would like for it to be complete by fall 2020. This is something that will be great for the college and the community. Mr. Holt stated his only concern is we get someone that isn't experienced with pouring concrete with our soil. He would rather we pay a little more and have it done right. This is a long term project. Dana said the telescope slab and the slab for the pavers will be poured at the same time.
